

## **ANTI-HYDRO® AH-1**

A non-corrosive admixture that integrally waterproofs concrete,  
increases workability, strength, hardness, & durability.

### **ADMIXTURE FOR:**

INCREASED HYDRATION  
WATERPROOFING  
COMPRESSIVE STRENGTH  
FLEXURAL STRENGTH  
TENSILE STRENGTH

# 95% OR GREATER HYDRATION!

Anti-Hydro AH-1 is a non-corrosive solution of organic and inorganic chemicals that reacts with Type-1/Type-2 Portland cement to produce more complete hydration. Water requirements, bleed water, capillaries and shrinkage are reduced. The increased hydration provides internal curing and a much denser, harder, and tougher cement paste that binds the aggregates together. Anti-Hydro AH-1 increases the early and ultimate strength of concrete. These combined reactions produce impermeable/waterproof concrete that is hard and non-dusting.

## INTENDED USE

STRUCTURAL CONCRETE

SWIMMING POOLS

BASEMENTS

STUCCO

MASONRY

PATCHING FOUNDATIONS

ELEVATOR PITS

SEWAGE & WATER TREATMENT PLANTS

SEAWALL CONSTRUCTION

TUNNELS

UNDERGROUND UTILITY CONSTRUCTION

SLABS-ON-GRADE

FOUNDATIONS

TILE

TANKS

TILT-UPS

COUNTER TOPS

PAVEMENTS

WATERPROOF SHOTCRETE

COLD WEATHER

**ANYTIME MORE COMPLETE  
HYDRATION OF CEMENT IS DESIRED.**

## FEATURES

- Resists extreme hydrostatic pressure from positive and negative side
- Provides moisture resistance
- Provides superior chemical resistance
- Resistant to freeze-thaw cycles
- Reduces or eliminate efflorescence
- Non-toxic, permanent & easy to use
- Complies with NSF STD 61 for potable water
- Accelerated set / reduced shrinkage
- Waterproof / impermeable concrete
- Increased flexural strength
- Increased tensile strength
- Increased bond shear strength
- Increased tensile shear strength
- Improved abrasion resistance
- Increased compressive strength early & ultimate

## BENEFITS

### HIGH STRENGTH

Dramatically increases strength - compressive, flexural & tensile

### HARDENING & DENSIFYING

Over 30% harder and denser

### WATER VAPOR CONTROL

Reduces all vapor transmission up to 85%

### INCREASED ABRASION RESISTANCE

Resists scratches, gouges & wear due to increased hardness

### COLD WEATHER PROTECTION

Keeps concrete & mortar from freezing, sets quickly

### CORROSION RESISTANCE

No penetration of chemicals minimizes corrosion

**ALL OF THESE ATTRIBUTES ADD UP TO DURABILITY!**

# HYDRATION COMPARISON STRENGTH TEST

# THE IMPORTANCE OF SUSTAINABILITY

Concrete is an essential part of our world. The use of concrete in construction affects the quality of human life in a positive manner. We also must recognize the importance of sustainability. It is estimated that approximately 4 billion metric tons of cement are used each year and that 5% - 9% of the world carbon emissions are generated by the production of cement.

## THIS BRINGS ABOUT AN IMPORTANT CHALLENGE!

Both the use of concrete in construction and sustainability are required for the current and continued well-being of humankind.

## ANTI-HYDRO PRODUCTS LLC ACCEPTS THIS CHALLENGE.

Our AH-1 product provides numerous improvements to concrete utilizing Portland cement. Ultimately the sum of those benefits is durability and longer lasting structures result in major contributions to sustainability. Reduction of raw material consumption, i.e cement, water, energy equals reduction in carbon emissions.

### ANTI-HYDRO<sup>®</sup> COMES IN 4 VERSIONS

Anti-Hydro <sup>®</sup> AH-1	Accelerated Set
Anti-Hydro <sup>®</sup> R	Retarded Set
Anti-Hydro <sup>®</sup> NC	Accelerated Set
Anti-Hydro <sup>®</sup> NCR	Retarded Set

## GET IN TOUCH WITH US

Our vast global network spans over 40 countries, serving all customers large and small, no matter the complexity of your order, we can meet your needs and will exceed your expectations.
